

Company Profile

contemporary | innovative | quality

Thompson Landscapes LLC

About Us

We are a well-established brand name and award winning landscape construction company in the United Kingdom. Based on this success, the company expanded six years ago to Dubai

Our business model varies from large and small residential projects to working with landscape architects and developers on large, commercial-scale projects

Our structured approach to project management has enabled us to confidently undertake projects of any scale from conceptual design to effective completion

We are fully equipped to handle all aspects of landscape projects with a team of in-house professionals capable of performing all landscaping aspects from master planning, conceptual design, construction detailing, procurement, site management, to completion and maintenance

Objective and Goal

To be recognised in Dubai as the most creative and innovative landscape construction company for both the private and commercial markets

To be the leader in landscape design and construction, and introduce new and environmentally sound creative ideas to the Dubai landscape industry

Our years of experience and competence ensure that we can deliver top quality end products regardless of our clients requirements. We are not just landscape contractors, but partners in creating memorable and successful open spaces that help shape the ever-changing and dynamic environment of today

Quality Policy

We are a service driven external works landscape contractor with a company philosophy of client satisfaction

Our unique management structure and project methodology are focused on improving our competitive position

We ensure our clients' quality expectations are adhered to at all times, and we deliver on our quality commitment for every project

Our policy is to promote a total company commitment to our quality policy and quality management system by providing our staff with a shared understanding of our processes and techniques

Services Portfolio

Thompson Landscapes target markets that position the company for growth, for example:

High-end luxury residential customers – who want something more innovative and creative than their neighbours; elements such as landscaped swimming pools, relaxation and children play areas and landscape design concepts that can stretch the boundaries

Commercial developers – who are building apartment complexes, office buildings, hotel and shopping arcades, and who want to feature landscape designs around the property; such as feature podiums and bespoke swimming pools to create exclusive landscape aspects

Our landscape projects work well because the company pays attention to detail, through a time honoured understanding of how each part or element of the project comes together

Services Portfolio (Con't)

Landscape Design

We offer expert advice on all aspects of garden design, planting, lighting, irrigation systems, paving and water features

Our staff are made up of qualified professionals who are able to guide our clients on industry best practice and help build the landscape of their dreams

Landscape Construction

Our services don't stop at design; we take the designs into the construction phase to help our clients realise their dream landscapes

We use quality natural materials and install them according to the design specifications

Our landscape construction works include:

- Softscapes
- Hardscapes
- Playscapes
- Water Features
- Swimming Pools
- Poolscape
- Landscape Lighting
- Landscape Irrigation
